

igris::schema::schema_node

```
graph BT; A[igris::schema::any] --> B[igris::schema::schema_node]
```

The diagram illustrates a relationship between two classes. At the bottom is a gray box labeled 'igris::schema::any'. A blue arrow points vertically upwards from this box to a white box at the top labeled 'igris::schema::schema_node'. This indicates that 'igris::schema::any' is a base class or a generalization of 'igris::schema::schema_node'.

igris::schema::any
